National Drug Take Back Day

The graphic features a blue pill with the word "dispose" written on it, and a white pill with "unused Rx" written on it. In the background, there is a blurred DEA logo. The text is arranged in a vertical stack, with the statistics and messages at the top, the pill images in the middle, and the event title at the bottom.

Did you
know...

Most abused prescription drugs come from family and friends. You could be a supplier and not even know it.

More Americans currently abuse prescription drugs more than the number of those abusing cocaine, hallucinogens and heroin combined.

Increasingly, prescription drug abusers are turning to heroin, which is less expensive and easy to obtain. The use of heroin, once thought to be an urban phenomenon, has become an epidemic impacting communities personally and financially.
